

SCIENCE Years 8 – 12

As students move through Years 8 to 10, Science and Mathematics are undertaken as separate subjects. Junior Science studies are based on the Australian Curriculum content, skills and general capabilities across various strands of Science in preparation for more specialised subjects in the Senior Sciences, where students can choose Tertiary or Accredited BSSS courses in Biology and Earth & Environmental Science, and Tertiary BSSS courses in Chemistry and Physics. Eligible students can also undertake extension H-Courses through Australian National University in Year 11 in the areas of *Astrophysics*, *Biodiversity*, *Chemistry*, *Discovering Engineering*, and *Physics*.
